

Logistics that empowers

Full Stack Developer

About Freight Tiger and the Opportunity

Freight Tiger has built India's largest unified freight network, which combines offline with digital to build an intelligent ecosystem for the logistics industry. This is revolutionary for a supply chain that is traditionally fragmented, offline, and time-intensive. As India aims to bring down logistics costs from over 14% to under 10% of GDP, Freight Tiger is positioned to be at the forefront of this ambitious endeavor.

Have you ever wanted to lead the success of a cutting-edge product that will change the very nature of an industry? We are looking for a top-of-class Product & Growth Marketing Lead to fuel our growth as we scale rapidly. This role is for those who like an open canvas to do their best work; we love off-the-wall ideas and are waiting to let you run with them.

Freight Tiger uses unique technology to solve operational problems for all stakeholders in the supply chain, from large-scale producers to individual drivers. It is truly neutral, which is virtually unheard of in the logistics industry. This will give you the opportunity to strategize for a vast variety of customers across a diverse range of product offerings. If you've always wanted to push your creative limits, this is the place for you.

What we need from you: deal well with ambiguity, resilience and grit, passion to market and position B2B technology products, and most importantly, lots of drive. What you'll get in return: a seat at the table at a growth-stage tech start-up with a brilliant team and massive potential.

The Nitty-Gritties

Location: Bengaluru

About the Role:

We're looking for an experienced full stack developer who will be able to develop highly-performant, reliable applications used by hundreds of external customers every day. You will be working on projects that span technologies, systems, and processes where you will design, test, and ship great code every day. In this cross-functional role, you will collaborate with experts in infrastructure, design, and operations to build mission-critical internal and external features that power Freight Tiger to its users. We have a high bar for quality & efficiency - you will collaborate closely with Product Managers and Business Operations teams to build for scale and create solutions.

Key responsibilities:

- Understand product requirements and features, keeping in mind the real-world problems that our customers face.
- Design and implement well thought out services, systems, and solutions that are **reliable**, **scalable** and **maintainable**.
- Work in an **Agile/Scrum environment** to deliver high-quality software. Break down complex projects/epics/stories into achievable tasks for developers.
- Experience with **API Design**, **ability to architect** and implement an intuitive customer and **third-party integration story**.
- Develop object-oriented models and design data structure for new software projects taking systems aspects into account.
- Participate and contribute to discussions and decisions for creating and improving architecture across applications and the software development processes.

Preferred qualifications/skills:

- B.Tech in Computer Science/Engineering with 3+ years of experience.
- Strong experience in developing highly scalable, fault-tolerant, distributed backend services.
- Product and design experience is a huge plus.
- Strong experience with microservices architecture and with building reusable server components.
- Strong programming experience in **Java, Javascript, or Go**. **PHP** experience is a plus.
- Strong experience with SQL and NoSQL database systems like **MySQL, PostgreSQL, MongoDB, etc.**
- Strong experience with frontend technologies such as **JavaScript, React, Vue, HTML, and CSS.**
- Should have exposure to async workflows and messaging queues such as **RabbitMq, Kafka, etc.**
- Must be open to experimenting with new technologies & enjoy working in a fast-paced start-up environment.
- Strong communication and interpersonal skills.

We offer a competitive salary, equity, and a quality health insurance plan.
