

Logistics that empowers

Data Scientist / Senior Data Scientist

About Freight Tiger and the Opportunity

Freight Tiger Freight Tiger has built India's largest unified freight network, which combines offline with digital to build a modern operating system for the logistics industry. This is revolutionary for a supply chain that is traditionally fragmented, offline, and time-intensive. As India aims to bring down logistics costs from over 14% to under 10% of GDP, Freight Tiger is positioned to be at the forefront of this ambitious endeavour.

Freight Tiger's malleable software enables a collaborative freight network, creating value for every stakeholder in the supply chain, from large-scale producers to individual drivers. It is truly neutral, which is virtually unheard of in the logistics industry. This will give you the opportunity to apply your financial acumen to creating profitability while addressing the needs of a vast variety of customers being served by a layered and complex solution.

What we need from you: the ability to deal well with ambiguity, have the foresight and think critically. If you're resilient, love a challenge and have lots of drive, you'll fit in well at Freight Tiger.

What you get in return: a seat at the table at a growth-stage tech startup with a brilliant team and massive potential.

Freight Tiger is backed by Lightspeed Venture Partners, Moonstone Investments, Shriram Transport Finance, Munjal Family Trust, Florintree Infra and Aroa Ventures.

Customers: Our 300+ customers include Saint Gobain, Dalmia Group, JSW Steel, ITC, DHL, MRF, and Pernod Ricard - many of India's largest companies.

The Nitty-Gritties

Location: Bengaluru / Mumbai

About the Role:

We're looking for an experienced Data Scientist who will help guide analysis, create insights and influence decisions. In this highly cross functional role, there is lots of opportunity to make a meaningful impact and increase growth by leveraging data science. You are curious, have strong data analysis and / or machine learning skills and the ability to communicate key insights effectively. You will be a founding member of Freight Tiger's newly formed data science team and will have a strong influence on the team's trajectory.

Key responsibilities:

- Partner with product, operations, sales and other business teams, understand their goals and execute on opportunities to draw relevant insights and drive tangible impact
- Complete the full analytics lifecycle from understanding the business objective and understanding the data to developing automated reporting and visualizations
- Effectively present analysis to teams and give data-based recommendations to encourage data-driven decisions, assisting in product ideation and feature launch decisions
- Think strategically on how to scale your work
- Identify areas for further investigation
- Drive a data and machine learning culture within your stakeholders

Preferred qualifications/skills:

- Advanced degree in quantitative field and 3+ years of experience (or 5+ years of experience)
- Proficient analytical skills for problem solving; can perform descriptive analysis, diagnostic analysis, predictive analysis and prescriptive analysis.
- Proficient in SQL, skilled in using data programming languages and visualization tools (ex. R/Python, Tableau)
- Strong track record of forming effective cross-functional partnerships
- Experience using data to meaningfully impact product strategy and execution
- Experience communicating analysis clearly to others
- Ability to research and learn new technologies, tools, and methodologies
- Ability to thrive in a dynamic environment, find opportunities and execute in both independent and collaborative environments

We offer a competitive salary, equity, and a quality health insurance plan.
