

Logistics that empowers

SAAS Architect

About Freight Tiger and the Opportunity

Freight Tiger has built India's largest unified freight network, which combines offline with digital to build an intelligent ecosystem for the road freight industry. This is revolutionary for a supply chain that is traditionally fragmented, offline, and time-intensive. As India aims to bring down logistics costs from over 14% to under 10% of GDP, Freight Tiger is positioned to be at the forefront of this ambitious endeavour.

Have you ever wanted to lead the success of a cutting-edge product that will change the very nature of an industry? We are looking for a top-of-class Product & Growth Marketing Lead to fuel our growth as we scale rapidly. This role is for those who like an open canvas to do their best work; we love off-the-wall ideas and are waiting to let you run with them.

Freight Tiger uses unique technology to solve operational problems for all stakeholders in the supply chain, from large-scale producers to individual drivers. It is truly neutral, which is virtually unheard of in the logistics industry. This will give you the opportunity to strategize for a vast variety of customers across a diverse range of product offerings. If you've always wanted to push your creative limits, this is the place for you.

What we need from you: deal well with ambiguity, resilience and grit, passion to market and position B2B technology products, and most importantly, lots of drive. What you'll get in return: a seat at the table at a growth-stage tech start-up with a brilliant team and massive potential.

The Nitty-Gritties

Location: Bengaluru

About the Role:

Freight Tiger is growing exponentially, and technology is at the centre of it. Our Engineers love solving complex industry problems by building modular and scalable solutions using cutting edge technology. Your peers will be an exceptional group of Software Engineers, Quality Assurance Engineers, DevOps Engineers, Infrastructure and Solution Architects.

We are looking for an Enterprise Software Architect to join our rapidly growing engineering team. You will be at the forefront of enterprise adoption of our cloud native software service. The role is at the crossroads of traditional enterprise tech and the latest in SAAS delivery. The right candidate must be self-motivated, fast learner who can bridge the technologies from either side efficiently.

Key responsibilities:

- Ownership of technology design and architecture.
- Work closely with product and business teams to gather technical requirements and device innovative solutions.
- Thoroughly document technology architecture, design decisions, trade offs.
- Keep abreast of the latest advances in their domain and bring in new approaches for business efficiency.
- Be the champion for software Engg best practices in terms of coding guidelines, testing methodologies, deployment and performance tuning.
- Mentor and coach junior members of the team.

Preferred qualifications/skills:

- Should have 12+ year's relevant experience.
- Experience building and operating complex SAAS systems at scale

- Experience designing and building highly configurable, customisable multi-tenanted software.
- System integration experience with RPC modes like REST, SOAP, EDI etc.
- Web based application delivery, cyber security.
- PHP, NodeJS, Java, Golang, Scala.
- MySQL, PostgreSQL, Cassandra, MongoDB, Kafka.
- Apache Camel, Mulesoft.
- SAP experience a bonus.

We offer a competitive salary, equity, and a quality health insurance plan.
