

Logistics that empowers

# Job Description Quality Assurance - II

## About Freight Tiger

Freight Tiger is India's largest freight network that combines offline with digital to build an intelligent ecosystem for the logistics industry. Founded by Swapnil Shah in 2015, the startup was the first to launch multi-tier visibility in India, which has become an industry norm today. Since then, Freight Tiger has grown to provide end-to-end logistics solutions that help businesses optimize their logistics operations and grow their business. In 2020, the company also launched financing solutions for customers to help them get access to credit and working capital.

Freight Tiger provides its services to 200+ clients including Saint Gobain, Dalmia Group, JSW Steel, Patanjali, Kohler, DHL, Damco, Parle and MRF among others.

Freight Tiger is backed by Lightspeed Venture Partners, Shriram Logistics and Moonstone Investments.

## Management Team

### Swapnil Shah

CEO & Founder

Swapnil is deeply invested in seeing a paradigm shift in logistics that will improve our everyday lives as makers, movers and consumers. He started his career as a research engineer solving surface engineering and tribology problems at Caterpillar's Technical Center. Prior to founding Freight Tiger, he worked with Dana Holding Corporation, where he played a key role to achieve one of the most successful turnarounds in the US automotive industry. He also set up Dana's commercial vehicle business in India. Prior to this, Swapnil was with Caterpillar Inc, where he set up two services businesses and led an effort to launch "Toyota Production System" through Lean 6 Sigma to achieve operations excellence at GM, Nissan and Mercedes Benz, in the US and Mexico. He holds a BE and an MS in Metallurgical engineering and an MBA from Harvard Business School.

## Amol Shah

Chief Operating Officer

Amol uses his decade long experience in supply chain and procurement with the world's most cutting-edge technology leaders to build operational capabilities at Freight Tiger. Prior to this, he was at Apple, where he played a key role in revamping operations to boost productivity and efficiency, launching new products within aggressive timeframes and rationalizing costs across 11 facilities in five countries. Prior to this, he led the process optimization effort for new product development at Siemens Energy across all business lines. He holds a BE in Production Engineering, an MS in Industrial Engineering and an MBA from Harvard Business School.

# Job Description

Location: Bangalore

## About the Role:

In this role, you will work on the test automation platform to enable testing across desktop and mobile devices. You will test production code both manually and with automated tools. You will not only perform the tests as pure black box testers but also understand software internals, debug problems, and write automated tests with Java scripts. You will work with Software Development Engineers to understand features and technical implementation. A successful candidate must have a strong drive for results, have an obsession for high quality, must be a team player, and must have the ability to work in a fast-paced start-up environment.

## Key responsibilities:

- Contribute to robust, scalable and high quality test automation solutions.
- Prepare Test scenarios and write Automation test cases for API and UI.
- Conduct manual and automated testing of web application and backend services.
- Conduct both black and white box testing.
- Understand feature requirements, identify positive/negative test cases to verify feature functionality and document the test cases.

## Requirements:

- At least 2+ years of hands-on scripting (automation) in languages like - Java, JavaScript.

- In-depth knowledge of any automation tool like Karate, Cucumber, TestNG, Puppeteer, and Selenium.
- 3-6 years of experience in testing.
- Experience in API testing using POSTMAN or any REST API testing tool.
- Experience in Functionality, Compatibility, Integration, and Regression Testing.
- Good knowledge in writing SQL Queries and understanding of Complex SQL Queries.
- Hands-on Experience in white-box testing, black-box testing, test case execution, result generation, status reporting, and defect reporting, regression testing, JIRA.
- Good communication and interpersonal skills.
- Good understanding of SDLC and Agile models.
- Good analytical, reasoning and problem-solving skills required.
- Be flexible and able to work in a fast-paced, dynamic environment.
- Be fast, efficient and able to juggle multiple projects.
